

New Haden Pumps

Rainwater Harvesting enviro-PAC

Why use drinking water to flush toilets?

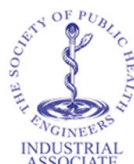

Nature delivers an abundant supply of soft rainwater, directly to buildings. Our system collects this rainwater, filters, stores and provides this on demand for uses such as WC flushing, irrigation, car washing etc.

New Haden Pumps

Enviro-PAC Main Components

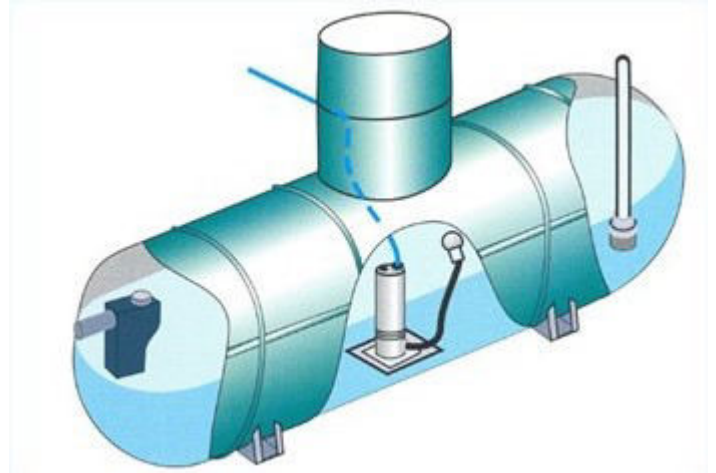

Tanks

GRP underground storage chamber available in various capacities for domestic and commercial applications.

Shapes and sizes available to suit site requirements.

Above ground chambers also available.

Filters

Underground filter units divert rainwater in to the storage chamber.

Excess water and filtered particles continue into the surface water drain.

Above ground filter unit also available.

Pumps

Submersible pumps are installed inside the storage chamber and incorporate a floating filter.

Surface mounted pumps usually installed inside an adjacent building.

Mains top-up unit operates automatically when there is insufficient rainfall.

UV Water Sterilisation available as an optional extra

This is safe reliable and simple to maintain
